Houston, TX | carloshuerta.enciso@gmail.com | <https://www.linkedin.com/in/carlos-huerta-enciso/>

OBJECTIVE

As an experienced front-end software developer skilled in HTML/CSS, JavaScript, and React, I'm eager to apply my expertise to your organization. My track record includes streamlining operations through solutions, and my coursework in computer science equips me to contribute effectively to the team's mission of solving complex problems.

TECHNICAL SKILLS

Programming Languages: HTML/ CSS, Javascript

IDE: Visual Studio, GitHub, Anaconda, Codepen

Front-End Tools/Frameworks: Canva, React

EDUCATION

University of Houston-Downtown, Houston, TX

Bachelor of Science in Computer Science

December 2022

Honors: Dean's List: Spring & Fall 2021, Cum laude

Relevant Coursework: Data Structures & Algorithms, Data & Information Structures, Software Engineering, Intro to Computing w/ Python, Web Programming, Database Systems, Artificial Intelligence

RELEVANT PROJECT EXPERIENCE

University of Houston-Downtown, Houston, TX

Personal Website | *Sole Developer*

October 2022

- Created a website using HTML/CSS and Javascript in showcasing my achievements and projects such as podcast, and technical blog for prospective recruiters and hiring managers to get an in-depth look of myself.

UHD Food Market Website | Co-programmer

November 2021

- Solve a bottleneck issue for the university's food pantry's services by developing a website using React, to streamline operations that services 60-100 daily visitors to the pantry.
- Self taught using the front-end framework *React*, to create an inviting and responsive website for the food market's users.
- Studied and Implemented the phases of software development for this project with a team of 5.

CLOSRR | Co-programmer

August 2022

- Assembled an android application to show users how they can take care of their electronics internally.
- Implemented features such as: "Flashlight reliability", "Overall Battery Health" and "Device Sound Quality".
- Explained to users the importance of properly recycling e-waste, and how it affects the planet.

RELEVANT WORK EXPERIENCE

Houston Community College, Houston, TX

June 2017 - August 2017

Summer Networking Intern

- Provided internet access via installing *Cisco aironet* devices to two new HCC campus locations that would house roughly 55,000 students a day.
- Learned how to configure aironet devices and how to strategically place them on large-scale college campuses without the risk of weak or interrupted signals.

Project GRAD Houston, Houston, TX

June 2020- August 2020

Summer Intern

- Administer office management to a non-profit such as calling campaigns, social media outreach, and data entry using *Salesforce*, to a membership base of over 1500 high school and college students.
- Demonstrated customer service skills in calling campaigns to all members about upcoming events, the calling list would range from 100-200 members.
- Assisted in explaining to a member the kinds of scholarships that they could apply to offset the cost of tuition. Normally this is handled by high level counselors of the organization, and was applauded by the supervisor for going above and beyond.

University of Houston System, Houston, TX

Gator Crew Member

July 2022 - August 2022

- Coordinated with a team of 12 people, in presenting an educational and enjoyable experience for incoming freshmen students to the University of Houston-Downtown orientation. Which averaged around 250-400 students per week.
- Participated in campus group tours showcasing the culture and community of the University of Houston-Downtown, would lead groups of 20-30 students.
- Solved a bottle-neck issue regarding student ID applications, distributing applications to students a day before they were assigned to get their student IDs, this helped around the 50-100 student groups getting said IDs, especially those that were underage and needed a parent's signature.
